DETAILED ACTION

Allowable Subject Matter

Claims 1-18 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and system for establishing secure transactions utilizing short message services (SMS). Each independent claim identifies the uniquely distinct features of "encrypting an authorization key in response to a first SMS message from the wireless terminal comprising a public key and a request for the authorization key; decrypting a third SMS message from the wireless terminal comprising an authentication code and a request for a traffic key; authenticating the third SMS message; encrypting the traffic key; and sending to the wireless terminal a fourth SMS message comprising the traffic key". The closest combined prior arts, Chojnacki (U.S. 6,768,942) and Vieweg (U.S. 6,748,082), disclose a conventional system for secure transactions between a wireless device and a control station but fail to anticipate or render the above underlined obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
